Letter from the Founders HFHF

XXXXXXXXXXXXXXXXXXXXXXXXXXXX

Dear Friends and Supporters,

Reflecting on 2020, we faced exceptional challenges and achieved remarkable milestones. The COVID-19 pandemic has significantly impacted our community, especially with school closures. Despite this, our commitment to the children's education remains strong.

During these challenges, we launched the Akira Project using online fundraising through our website and foundation's Social media aiming to solve two problems with the secure funding for our education programs and the community empowerment.

We are proud to announce our partnership with the Ministry of Health in Rwanda and Vitamin Angels to enhance the health and nutrition of vulnerable children. This initiative allows us to provide essential vitamins and Albendazole 400mg for over than 810,000 children under-five aged country wide in 17 District of Rwanda, boosting their immunity and well-being.

Additionally, 2020 marked our official registration as an NGO, enabling us to better represent and advocate for the children we serve.

We extend our heartfelt thanks for your unwavering support. Your belief in our mission and generous contributions have been vital. As

Continue this journey with us and we move forward, we remain focused on providing a safe and nurturing environment for orphaned and vulnerable children in Rwanda. Please we request you to explore more about our work on our website: homeforhoperw.org.

Thank you for being an essential part of our story.

With sincere gratitude,
Noel Odenwald & Maureen Odenwald
Founders, Home for Hope Foundation

Home for Hope Foundation(HFHF)

Our Vision

See our children blossom into adults who can pass on the life skills live healthy, happy lives and give back to the community.

Our Mission

Bring children from oppression to a life filled with hope and change for an emotionally and physically healthy, successful, and self-sustaining future that can be passed on for generations to come.

HFHF: Is a not-for-profit making organization founded for inspiring and empowering orphans and vulnerable children through quality education and healthcare towards meaningful sustainable future that can be passed on to future generations.

Hope is Our Key

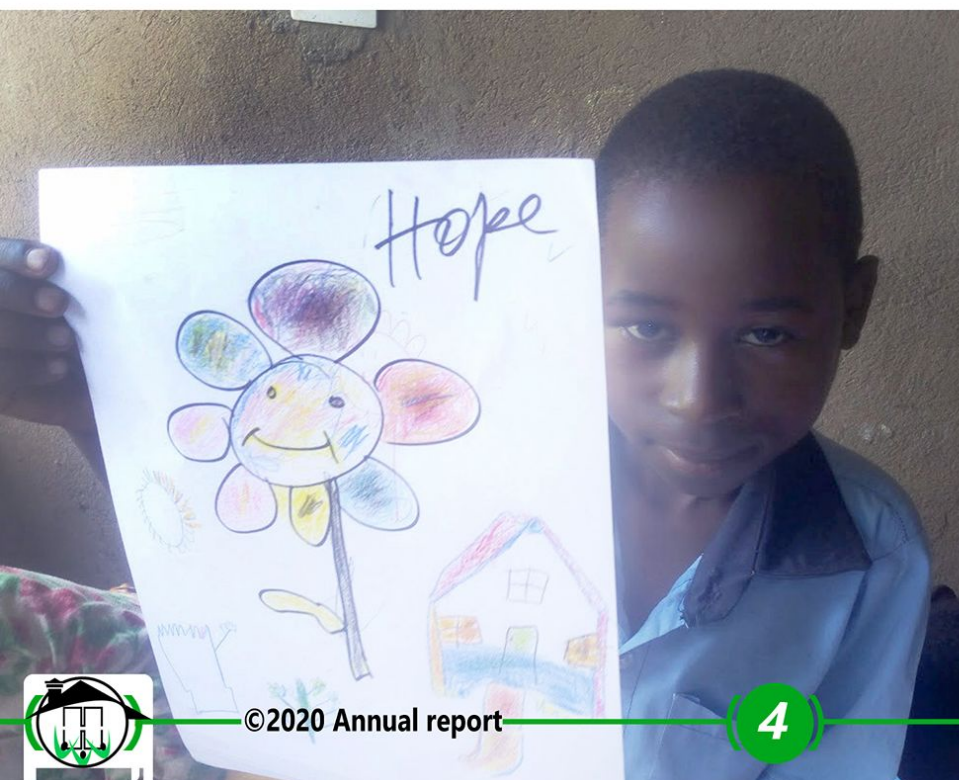

Every child has the right to attend school and receive a quality education, without any exceptions.

//

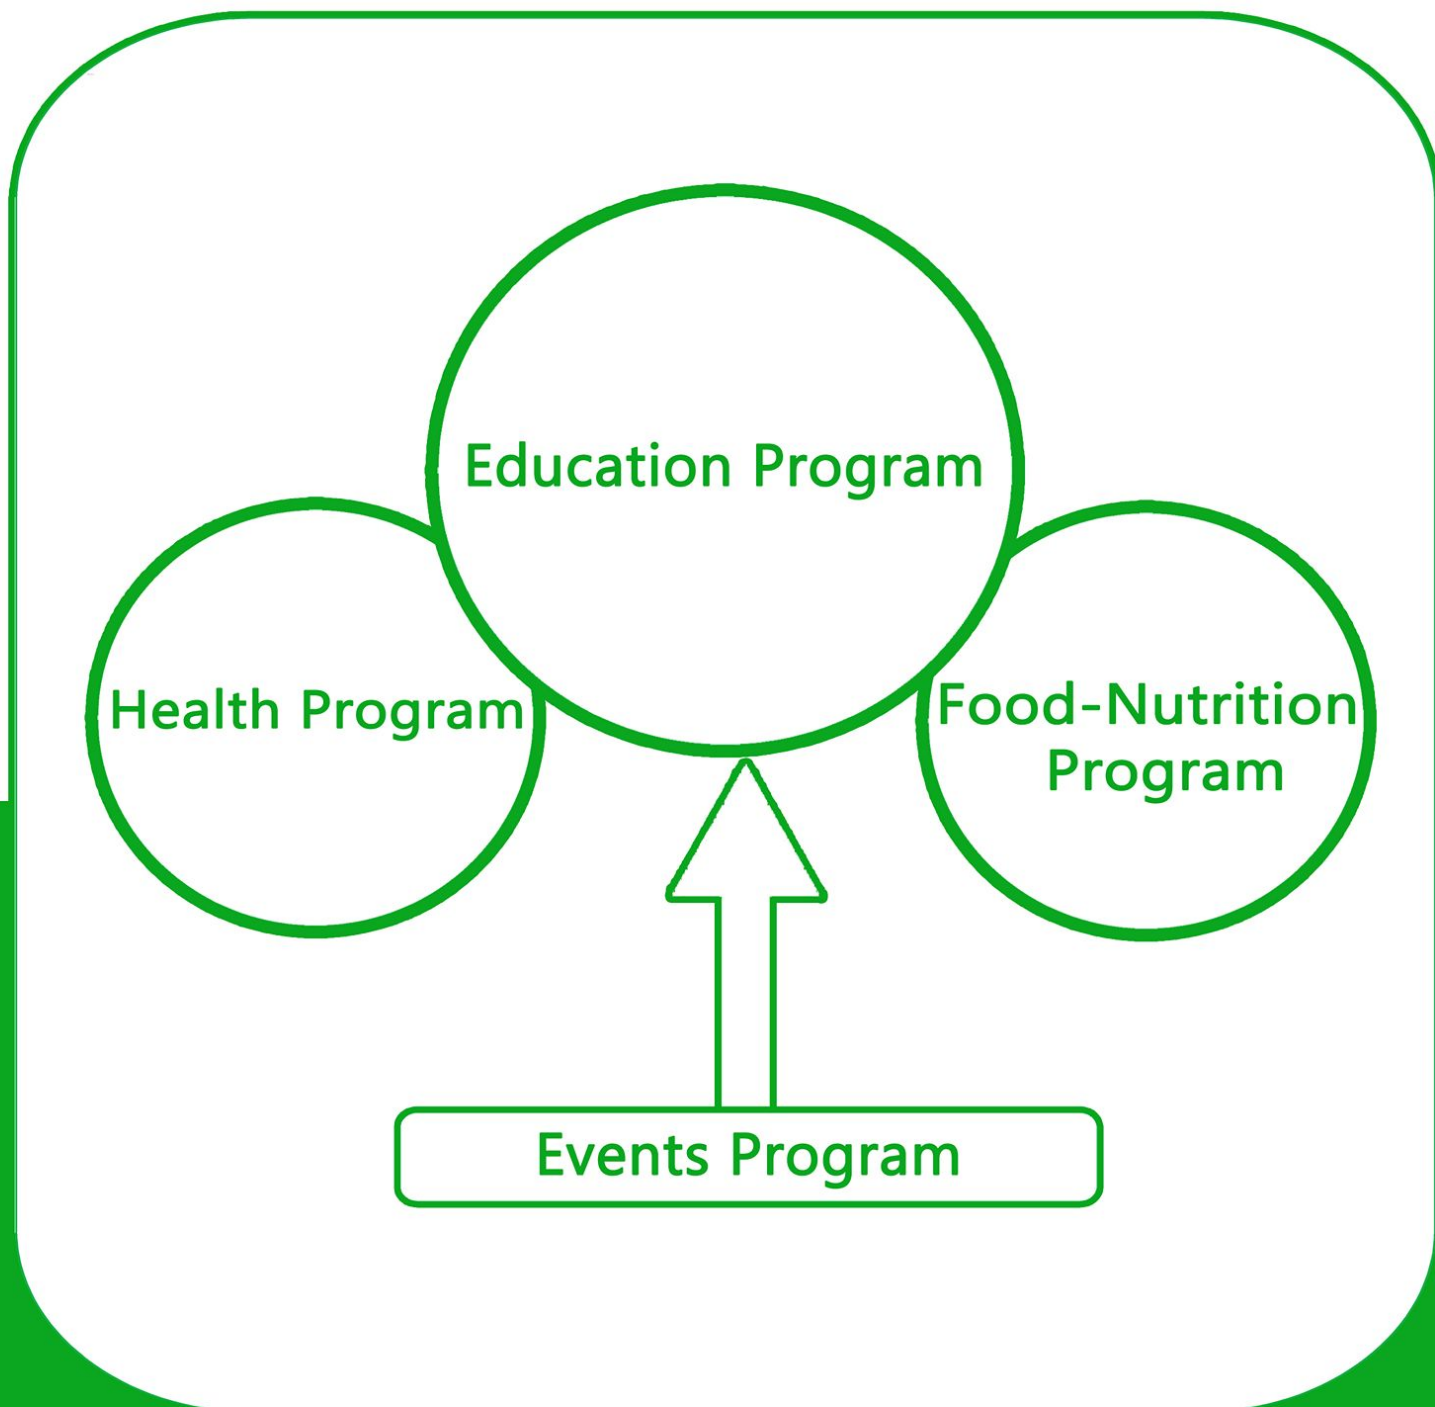

We're empowering Girls Through Quality Education for Sustainable Generations, **"To educate a woman is to educate a Nation"** Girls face significant challenges, influenced by the culture and history of many African countries.

We're promoting sustained access to quality education as our focused point and the basement of the Home for Hope Foundation. This means a long time project, follow up and this is including early childhood development, primary, secondary, later soon University and if in need vocational education.

Areas of Interventions

All of Home for Hope Foundation's interventions support education to empower children towards self-sustainability future that can be passed on for generations to come.

Projects executed

Although 2020 has been a destabilizing year, it has also prompted the Home for Hope Foundation to take action and started a very good project of Akira project as a solution of the funds. All our efforts are focused on children's education and their well-being

Education: Sent Students to school

Education Program

Home coaching Project

During the COVID-19 lockdown, the Home for Hope Foundation initiated a home coaching Project to ensure the children continued their education and maintained their academic progress. This program was designed to prevent learning loss and keep the children engaged in their studies despite the school closures. Through dedicated coaching sessions, we provided the necessary support and resources to help the children stay on track and prepare for their return to school.

The children also engage in gaming activities, including puzzles, for their refreshment and mental stimulation.

Education Program

Uniforms

At Home for Hope Foundation, we prioritize providing school uniforms annually for the children under our care. Most of these children come from impoverished backgrounds and many are orphans. As a result, they often lack adequate clothing and rely on their school uniforms not just for school but also as their primary attire at home. This dual usage means that the uniforms experience considerable wear and tear, necessitating yearly replacements to ensure that the children have appropriate and presentable clothing for school. By supplying new uniforms each year, we ensure that our children can attend school with dignity and confidence, reinforcing our commitment to their well-being and education.

Education Program

The necessary School supplies

In 2020, despite the numerous challenges posed by the COVID-19 pandemic, we ensured that the children under our care were well-prepared for their return to school. We provided them with all the necessary supplies, including uniforms, notebooks, bags, pens, pencils, and other essential items. This comprehensive support aimed to equip them with the tools they needed to succeed academically and foster a sense of normalcy and stability in their educational journey.

Health Program

Holistic support Including Health

In 2020, the Home for Hope Foundation identified and assisted several families in dire need, including a widower with six children living in extreme poverty.

Through the efforts of the village leader, who played a crucial role in identifying families in need, we were able to visit the widower's home and assess their living conditions. What we found was heartbreaking; the family was living in conditions that were far from suitable, lacking basic necessities.

This case underscores the importance of community involvement and the impact of our foundation's work. By collaborating with local leaders and directly engaging with families, we can identify those in need and offer holistic support that addresses multiple aspects of their well-being.

Our commitment to improving the lives of vulnerable families like this widower and his children remains strong. We will continue to work tirelessly to provide comprehensive support and create a better future for those we serve.

Health Program

Holistic support Including Health

Upon recognizing their urgent need for assistance, Home for Hope Foundation stepped in to provide support as the following:

- ✔ Payment for a full year of health insurance (Mutuel de santé) coverage for all seven family members: This allows this family to received health service full year.

The payment was made properly

Food and Nutrition Program

No food No Life

In 2020, the Home for Hope Foundation (HFHF) initiated a program to empower the mothers of the children we support by organizing them into groups aimed at enhancing economic resources.

These groups focused on small development projects, particularly in agriculture. This year, the mothers cultivated crops in two districts, Bugesera and Gasabo.

HFHF rented 3 hectares in Bugesera and 1.5 hectares in Gasabo, providing them with high-quality seeds, fertilizers, and cattle manure to boost production.

After a successful harvest, the maize was sold, and the profits were evenly distributed among the participants

Food and Nutrition Program

Akira Project 2020

AKIRA is Kinyarwanda word means "RECEIVE" we are giving pigs to the most marginalized communities and the poor families in Rwanda.

We use this program to empower families and increase their productivity through their small livestock farming by getting nature manures.

During the implementation of AKIRA 2020, we shared life experiences and ways to overcome challenges with the beneficiaries.

We also clarified our mission statement, emphasizing the possibility of achieving self-sustainability that can be passed on for generations to come.

Although it was not easy to implement, this initiative supported the government of Stay at Home program to fight against COVID-19 among our beneficiaries, ensuring their safety.

FAMILIES

FAMILY MEMBERS

DONATIONS

Project main objectives:

*Increase income generation.

*Improvement of the harvest using organic manures.

*Fighting against Malnutrition of the children (We recommend all of them to have Vegetable gardens).

Akira Project 2020

Success story of Mukarukaka Anisia's Journey:

Mukarukaka Anisia, a 32-year-old mother of four boys, was selected by her village in 2020 as one of the families in need of support. She was fortunate to receive a pig from the Home for Hope Foundation in its project of Akira 2020, which she raised and eventually sold to build an additional room for her children.

Determined to improve her life, Mukarukaka made a life-changing decision; she chose to stop having more children and returned to school, convinced that "she will make it." Remarkably, she became a student at the same school as three of her children.

However, she faced significant challenges in paying school fees. At times, her children were sent to her classroom by school authorities, asking for payment, saying, "Mom, the school authority was asking us for money."

Recognizing the family's need for comprehensive support, the Home for Hope Foundation decided to take in Mukarukaka's three children, ensuring they receive the care and education they deserve and covering her tuition fees as well.

Akira Project 2020

Double twinned Mother getting 2 Pigs in AKIRA Project 2020

Food and Nutrition Program

Akira Project 2020

In 2020, among the beneficiaries of the HFHF's Akira project 2020 was a family that had endured significant hardship. This family, which originally included two sets of twins, tragically lost one of the twins, leaving them with six members. Their daily struggle was focused on generating just income to provide food for the day.

Recognizing their need, HFHF provide them with two pigs. These pigs not only contributed manure for their kitchen garden, enhancing their agricultural productivity, but also supported their small-scale livestock farming efforts.

While this family received much-needed assistance, there are still many families in similar circumstances who remain in need of support. Unfortunately, due to limited funding, the Home for Hope Foundation has not yet been able to extend support to other families facing such challenges, including those with children who need access to education.

Food and Nutrition Program

Akira Project 2020

In 2020, the AKIRA project identified a handicapped mother who had been disabled since birth, living alone with her only son in a small house. Recognized by the village leader as a family in dire need of support, the Home for Hope Foundation stepped in to help.

Moved by her story, the HFHF made a special effort to donate two pigs to this mother, providing her with a means to improve her livelihood. This gesture was not just about giving; it was about empowering her to create a better life for herself and her son.

There are countless families like hers—living in loneliness and poverty—who are in desperate need of support. By joining hands with the Home for Hope Foundation, we can extend this impact to reach even more communities in need.

Food and Nutrition Program Akira Project 2020

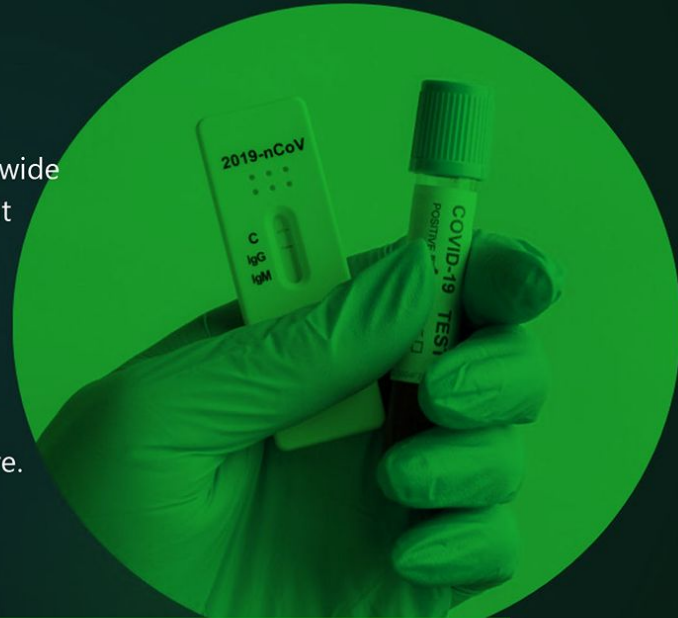

Covid-19 Response

Discussion summary

In March 2020, the COVID-19 pandemic reached Rwanda, impacting the country like the rest of the world.

To reduce the spread of the virus, the Rwandan government implemented strict measures, including a lockdown and country-wide restrictions. These measures, while necessary, created a significant challenge: many people were unable to work and struggled to find food while confined to their homes.

In response, the Home for Hope Foundation stepped in to support vulnerable children from impoverished families, particularly those with children already under our educational care. These families were in need of direct food assistance.

OUR RESPONSE IN NUMBERS

35 families, totaling 231 individuals, received nutrition (food) as direct support

1.5 + tones of direct food aid to those families

20 Handwashing stations, given in community

1200 face masks were given in community

Covid-19 Response

Hand Wash

During the COVID-19 pandemic, the Home for Hope Foundation (HFHF) actively supported the government's "Hand Washing" initiative by educating beneficiaries on the importance of regular hand hygiene.

Covid-19 Response

Food Sharing

The Home for Hope Foundation (HFHF) supported the government's "Stay at Home" program during the fight against COVID-19 by providing food to beneficiaries, ensuring that the children in our care did not go hungry.

Registration Process

Officially registered since 15th December 2020, The Home for Hope Foudation is Is a not-for-profit making organization founded for inspiring and empowering orphans and vulnerable children through quality education and healthcare towards meaningful sustainable future that can be passed on to future generations.

Acknowledgement

We extend our thanks to the generous contributors and dedicated supporters whose commitment made 2020 a year of progress and impact for the Home for Hope Foundation. Your invaluable contributions have fueled our mission, and we are honored to recognize each of you. Thank you for standing with us and helping create brighter futures.
